FROM SCIENCE TO REAL-LIFE ONCOLOGY

The ECCO 2018 European Cancer Summit will bring worldwide leaders from the cancer healthcare, patient advocacy and stakeholder communities together in a unique multidisciplinary forum.

Connecting science with real life by driving policy evolution at the highest political level, the Summit will:

- Debate leading-edge ideas on outcomes research, health economics and organisation of cancer care delivery
- Determine consensus resolutions for improving health systems
- Decide on an action plan for the way forward to ensure ideas translate into policies that will impact daily clinical practice

Join us and be at the heart of the change-making community in European cancer care!

INTEGRATING MULTIDISCIPLINARITY AND PATIENT PERSPECTIVE ACROSS THREE PILLARS:

Outcome Research

Using real-world data to observe how new treatments and diagnostic modalities have performed in the clinic

Health Economics of Cancer Care

Developing consensus resolutions on the cost-effectiveness and implementation of cancer molecular characterisation and new cancer diagnostics and therapies

Organisation of Cancer Care Delivery

Focusing on the patient voice to determine an agreed vision for guiding and supporting patients through diagnosis, treatment and follow-up in a world facing an ageing population, increasing survivorship and a technological revolution in e-health resources
